Re: BOSCH TRUCKING COMPANY - PEORIA FACILITY
NPDES Permit No. ILR001910
Notice of Coverage under General Permit

Dear NPDES Permittee:

We have reviewed your application and determined that storm water discharges associated with industrial activity (excluding construction sites) are appropriately covered by the attached General NPDES Permit issued by the Agency.

The permit as issued covers application requirements, a storm water pollution prevention plan, and reporting requirements. The storm water pollution prevention plan must be completed within 180 days of this notification of coverage and shall provide for compliance within 365 days of this notification of coverage.

Failure to meet any portion of the permit could result in civil and/or criminal penalties. The Agency is ready and willing to assist you in interpreting any of the conditions of the Permit as they relate specifically to your discharge.

The Permit is applied to your discharge effective on the date of this letter. You have the right to appeal the Agency's decision to cover your discharge by the General Permit to the Illinois Pollution Control Board within a 30 day period following the date of this letter.

This letter shows your facility permit number below your facility name. Please reference this number in all future correspondence. Should you have any questions concerning the Permit, please contact the Permit Section at 217/782-0610.

Very truly yours,

Thomas G. McSwiggin, P.E.
Manager, Permit Section
Division of Water Pollution Control

Re: Storm Water Permit Coverage for Group Applicants

Dear NPDES Group Applicant:

The Illinois Environmental Protection Agency has received notification from the USEPA that your facility is part of a storm water group application.

The IEPA has elected to cover your facility under the Illinois Storm Water General Permit instead of the Federal Multi-Sector Permit.

The Agency believes that coverage under the Illinois General Permit will be more appropriate than coverage under the Federal Multi-Sector Permit because:

1. The Federal Multi-Sector permit is 684 pages. The Illinois General Permit is 11 pages.
2. The Federal Multi-Sector Permit requires ongoing monitoring. The Illinois General Permit does not require any additional monitoring.
3. Both the Federal and Illinois General Permit requires a Storm Water Pollution Prevention Plan. The Illinois plan is to be completed within 180 days of notification of coverage by the Agency and shall provide for compliance within 365 days of notification.
4. The Federal Multi-Sector permit requires that the facility submit ongoing inspection reports required by the Storm Water Pollution Prevention Plan. The Illinois General Permit requires that the facility submit an annual inspection report.

You have no further compliance obligations under the provisions of the stormwater permitting requirements until you receive notification that your facility is covered under the general permit. In the near future the IEPA will send you such notification of coverage and will assign your facility a permit number. A copy of the Illinois General Permit Requirements will also be included.
